RIPE Atlas & RIPEstat

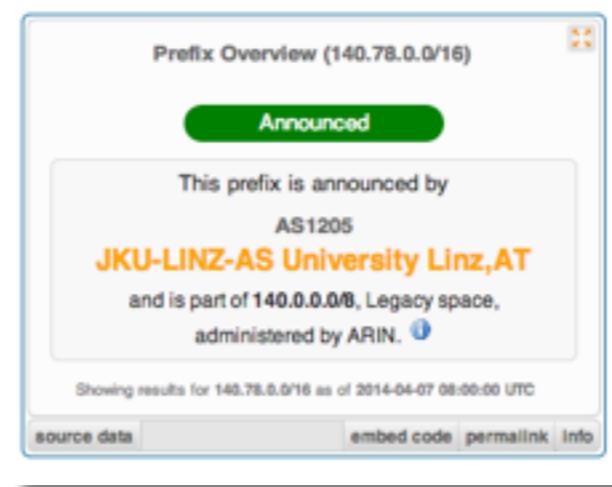

Christian Teuschel
Science Division
RIPE NCC

MENOG 15, April 2015, Dubai

- <https://stat.ripe.net>

The screenshot shows the RIPEstat interface for a specific IP prefix. On the left, there's a sidebar titled "At a Glance" with links to Routing, DNS, Anti Abuse, Database, and Geographic sections. The main content area has a title "Prefix Overview (140.78.0.0/16)" with a green "Announced" button. It states that the prefix is announced by AS1205 JKU-LINZ-AS University Linz, AT, and is part of the 140.0.0.0/8 legacy space, administered by ARIN. Below this, it says "Showing results for 140.78.0.0/16 as of 2014-04-07 08:00:00 UTC". To the right is a map titled "Geoloc (140.78.0.0/16)" showing the location in Europe, with a red dot indicating the prefix's origin near Linz, Austria.

- 40+ data calls
- 50+ widgets

RIPEstat Widgets

This is a complete list of all of the widgets that RIPEstat offers. Each of these widgets can be accessed using the links below.

When you view a widget you can also get code for **embedding** it in your own pages. The full procedure for embedding and configuring widgets is described in the Widget API Documentation.

System Statistics

Query rate on RIPEstat 138.5 kq/h

- BGP routing data
- Registry data
 - RIRs
 - IANA
- DNS data
- Geolocation data
- Blacklist data
- Active measurement data
 - RIPE Atlas
 - MLab (broadband distribution, network activity)

RIPEstat Data Sources

RIPEstat is based on the collection of data from various sources:

- [RIPE Database](#)
Registration data and anti-abuse contact information is based on the RIPE Database
- [RIS \(Routing Information Service\)](#)
- [RIPE Atlas](#)

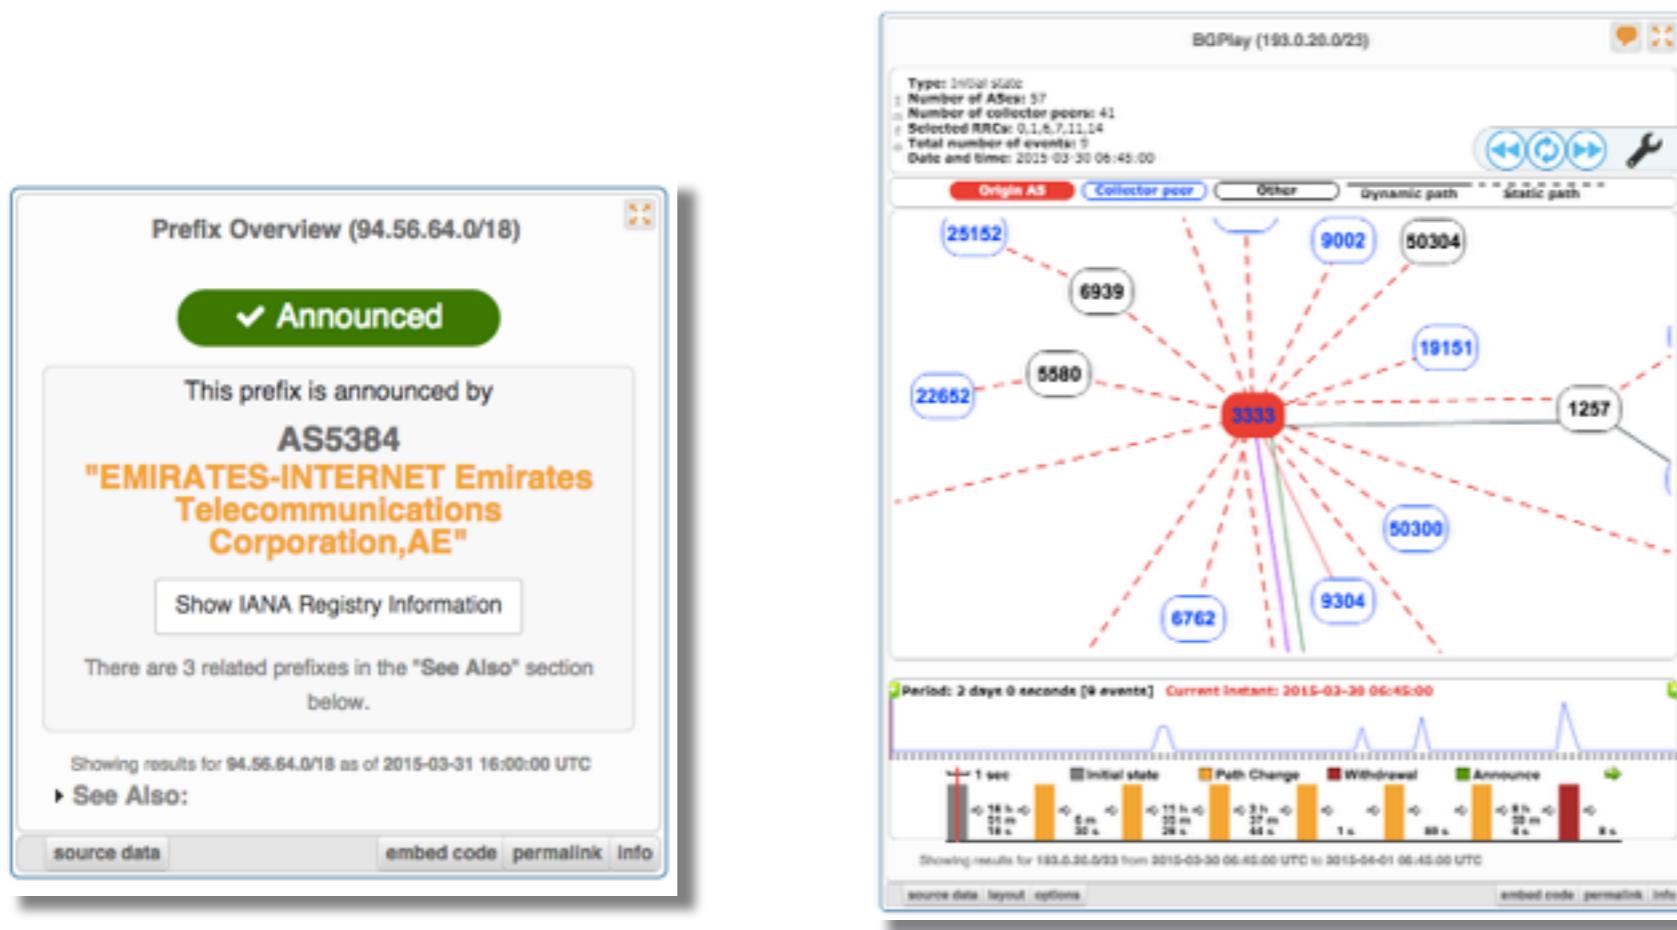

RIR authority data

The RIR statistics files summarise the current state of Internet number resource allocations and assignments. They are intended to provide a snapshot of the status of Internet number resources, without any transactional or historical details. Find details for each RIR here:

- [AFRINIC](#)
- [APNIC](#)
- [ARIN](#)
- [LACNIC](#)
- [RIPE NCC](#)

- Collected by RIS (<https://ris.ripe.net>)
- Indicator for network visibility

<https://stat.ripe.net/widget/prefix-overview#w.resource=94.56.64.0%2F18>

- Available real-time & historically

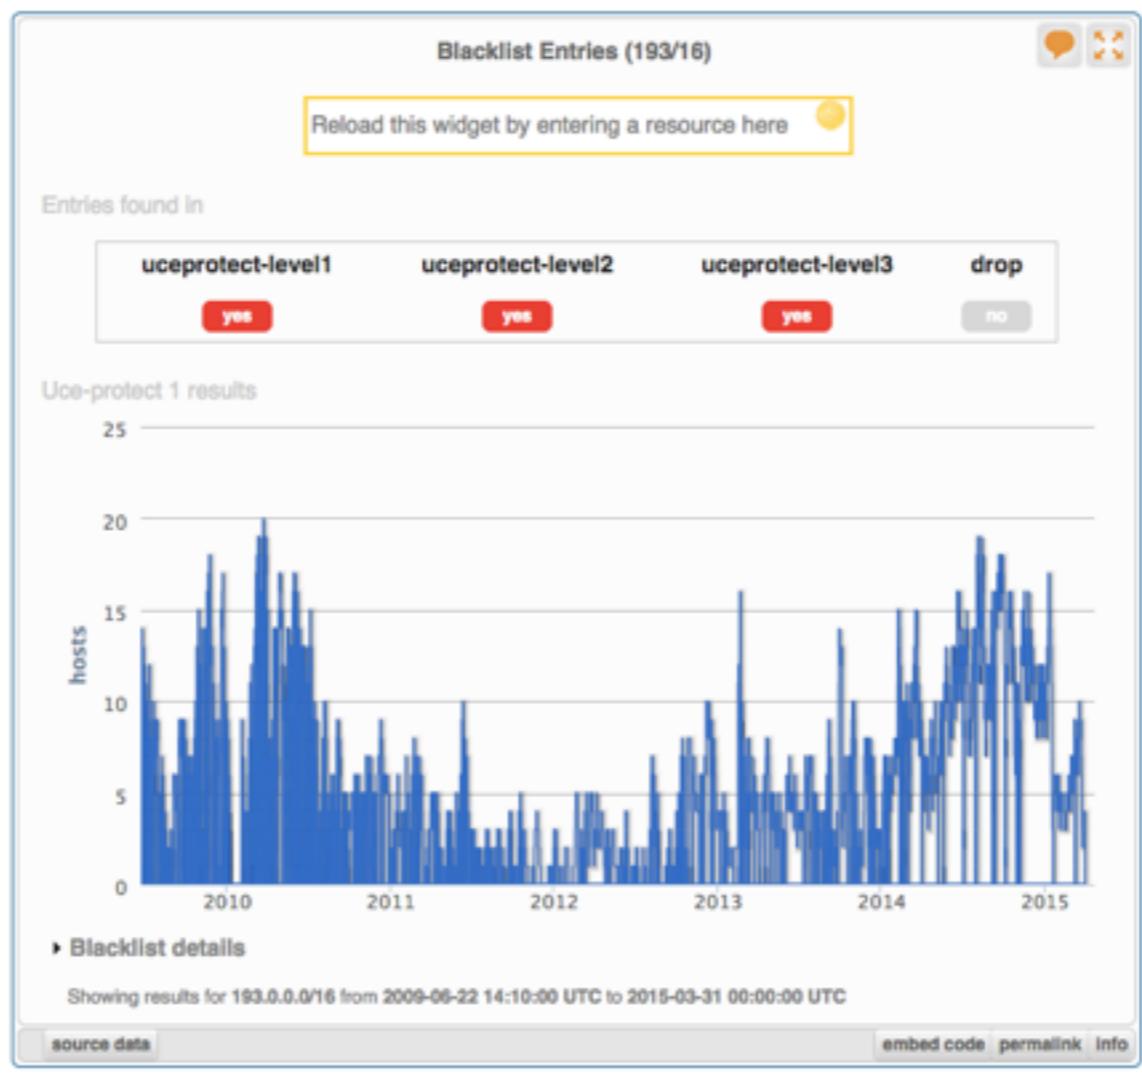

<https://stat.ripe.net/94.56.64.0/18#tabId=routing>

- Based on MaxMind's GeoLite data set
- IP to location mapping
- Used by many e-commerce sites to determine origin of request

<https://stat.ripe.net/94.56.64.0/18#tabId=geo>

- Various blacklists available
- Identify status of your network

<https://stat.ripe.net/widget/blacklist#w.resource=193/16>

- Providing contact data (abuse-c) for abuse reporting
- Tutorials and help for handling abuse available

The screenshot shows a web-based tool titled "Abuse Contact Finder (193.0.20.0/23) BETA". The main content area displays the following information:

- Email-Contact:** abuse@ripe.net
- Contact-Quality-Rating:** ★★★★★ (5/5)
- Note:** This contact can be used to report abuse.

At the bottom left, there are two checkboxes:
□ Show Complete Details
□ Info for Resource Holders

At the bottom center, it says: Showing results for 193.0.18.0-193.0.21.255 as of 2015-03-31 21:18:00 UTC

<https://stat.ripe.net/widget/abuse-contact-finder#w.resource=193.0.20.0%2F23>

- RIPE DB plus other RIRs
- Internet Routing Registries (IRRs)

The screenshot shows a web-based registry browser interface. At the top, it displays the title "Registry Browser (inetnum:94.56.0.0/14)" and a button to "Reload this widget by entering a resource here". Below this, a yellow box contains the following information:

3 changes since 2008-06-12.
Last updated on 2009-03-07 at 09:32:29 UTC.

inetnum: 94.56.0.0/14

org: ORG-ETC1-RIPE
netname: AE-EMIRNET-20080612
descr: Emirates Telecommunications Corporation
country: AE
status: ALLOCATED PA
mnt-by: RIPE-NCC-HM-MNT

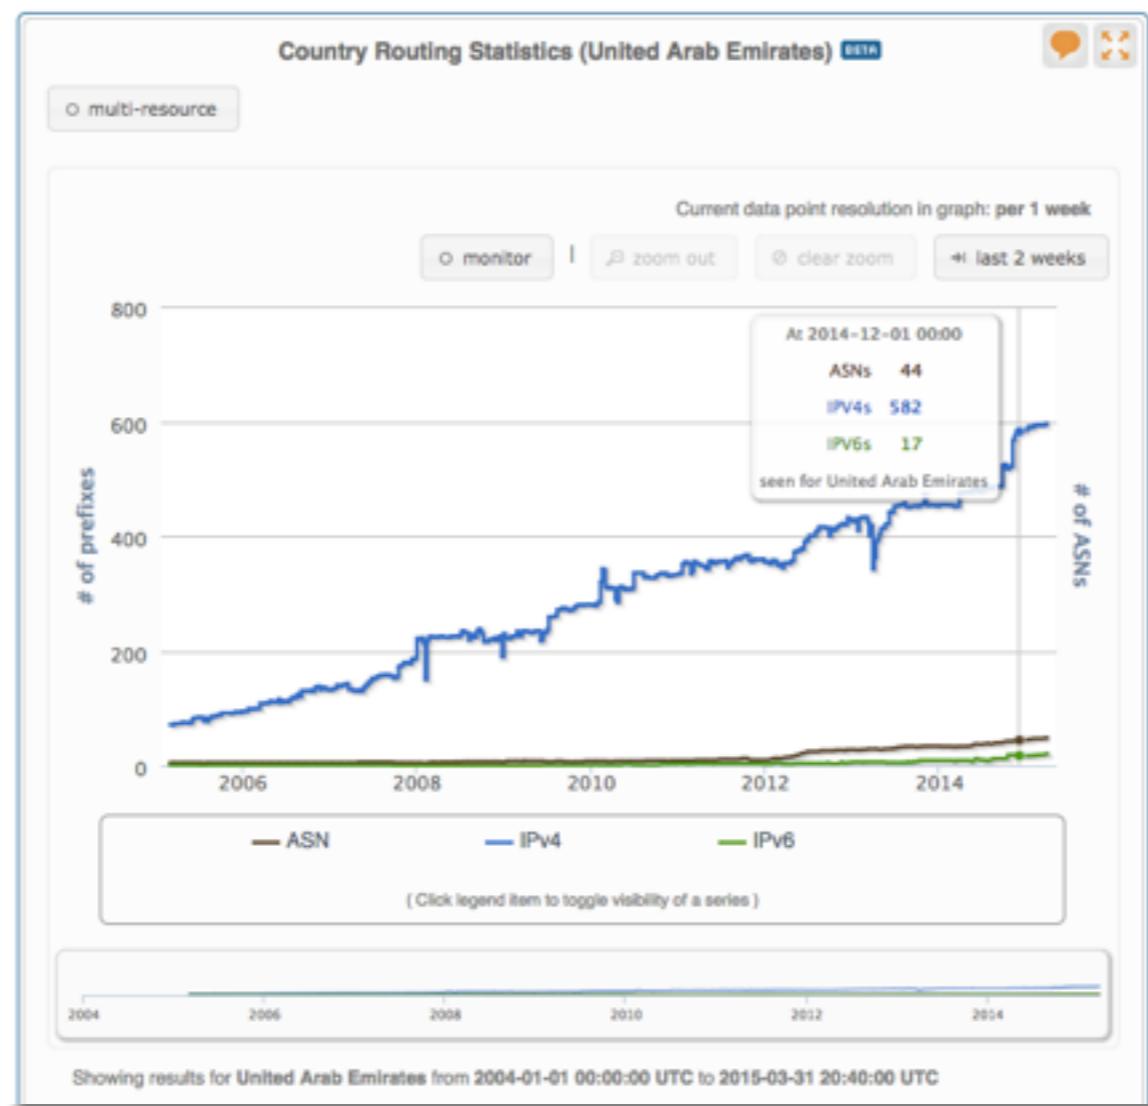

Below this main box, there is a downward arrow pointing to a list of related resources:

- organisation: ORG-ETC1-RIPE [org] Show more
- person: Abdulla Hashim [admin-c] Show more
- person: Sultan Al Shamsi [tech-c] Show more
- mntner: RIPE-NCC-HM-MNT [mnt-by] Show more
- mntner: ETISALAT-MNT [mnt-lower, mnt-routes] Show more

At the bottom of the interface, it says "Showing results for 94.56.0.0/14 as of 2015-03-31 21:15:11 UTC".
