Data protection is a fundamental right

As a fundamental right it's connected with national and International law.

They include some acts about protection.

The first is

The data protection act 1998

The second is

GDPR (DPD Data Protection Directive 1995 turn into GDPR)

The important step in international law is The data protection act 1998

Fee for viewing the data

Correct the incorrect information

Don't use the data for database marketing

Some principles of P.D. – Personal Data

P.D. shall be processed lawfully

Information shall be kept for specific purposes.

P.D. shall be obtained for lawful purposes

Technical measures shall be taken against loss of data.

P.D. shall be adequate

P.D. shall not be transferred outside the European Economic Area.

The second act is GDPR

- The protection of personal data is a fundamental right for all EU citizens.
- That is why a new legal framework will be applied on May 25.
- Most people share their personal data with organizations, agencies, and individuals through their social networks.

About new rights

- ✓ The right of access: You can request a free e -copy form of your stored data by a particular company.
- The right "to be forgotten": You can withdraw the consent you have given for the use of your personal data.
- ✓ The right to data portability: You can transfer your data whenever you want it from one service provider to another.
 - ✓ The right to be informed: At the outset of any request for data, businesses must be as clear as possible on how they will process data.

- ✓ Right to rectification: When your personal data are inaccurate, then controllers need to correct them indeed.
- ✓ The right to restriction of processing: Simply said, your right to limit the processing of your personal data with several rules and exceptions of course.
- ✓ Right to object: You can immediately stop processing your data for marketing purposes.

✓ Notification right: In the event of a breach of data that compromises your personal data, the organization should inform the Processor within 72 hours of the first time that the violation was identified.

The principle of GDPR based on agreement of Data Controller and Data Processor.

The agreement must be done freely, only for correct purpose and lawfully.

The cultivation of subject's rights can have "high risks", so the compliance with ISO 27001 is one and only independent and internationally recognized security standart.

DPO: there is a special officer for Data protection, the officer deals with monitoring and connection with Government.

Commissioners advice ICANN on GDPR implementation

About WHOIS system

- ✓ Change it
- ✓ To make it private
- To find a bridge between public policy objectives and compliance with GDPR's regulations

RIPE NCC shares its GDPR compliance model

Personal data in the RIPE Database

- >It contains all registration details,
- > Also contact details of responsible people.
- Contact details of <u>resource holders</u>

The Database is open and the first condition is connection between network operators especially during offenses and they can have administrative and responsible people's contacts for circumstances like that.

Removal of Personal Data

- Resource holder can apply for removing the data.
- ▶ In the same time the resource holder must find another individual who is willing to share their data in RIPE Database.

Conclusion

The RIPE NCC is confident that the current RIPE Database operations are in line with the requirements of the GDPR.

What is the idea of Data protection?

At first now it's actual topic

Data protection is the serious problems not only for the lawyers, but also for the world.

What I want to do

Imagine a country which is surrounded by different enemies but it has a very weak army. So if we want to feel safe, at first we need to be able to protect our own data.

What can I suggest?

Every person must know ,that his/her rights are save in virtual world.

What influence can GDPR have on Eastern Europe and Armenia?

- The main problem is the cybercrime.
- The rate of cybercrime in Armenia increases (According to the annual report of Armenian police to the Government).
- Armenian Government has regulations about Data protection.

GDPR's influence on non-EU countries

- ✓ The compliance of EU agreement with national legislations is the main problem that countries must solve after adopting it.
- ✓ Non-EU countries will do the same, they will add regulations which will be in compliance with GDPR.

Andorra, Argentina, Canada, Faroe Island, Guernsey, Israel, Isle of Man, Jersey, New Zealand, Switzerland, Uruguay are EU countries that will validate the regulations all other non-EU countries should transfer data only if they can provide proper conditions for protection.

✓ In any non-EU country that isn't mentioned in this list should has own national legislation which will compliances with GDPR(ISO 27001 standart), because every country should has own standarts for proper protection and every citizen should know that his/her rights are protected.

Not only countries, but everyone need to be informed about GDPR

- GDPR is the weapon that everyone need.
- GDPR cares for productive protection.
- It has a regulation if the person isn't agree with the rules they will never sign an agreement.
